COMPUTER SKILLS

Skills and Languages

- Agile Methodologies
- React JS
- Git/version control
- Elavon: Converge

Previously Exposed To

- Java
- C++
- Ruby on Rails

Hackathons

- FiskHacks 2016
- Hack-MTSU 2017
- Co-Hosted MLH Local Hack Day at Tennessee Tech 2017 & 2018

EXPERIENCE

Software Engineer Intern

May – September 2019

SAIC - Cookeville

- As a summer intern I was part of a fast-paced Agile team where I attended and occasionally ran daily scrums. I worked on two different projects: CCE Dashboard and SAFe web apps. My tasks largely included developing the frontend using React JS as well as using a continuous integration pipeline as a part of my daily workflow.

Frontend Developer

May – August 2017

ComPASS – Tennessee Technological University

- Over the summer of 2017 I worked as a frontend web developer on a project called ComPASS. ComPASS's aim is to create a site that would evaluate how the people living in nursing homes are treated and then use the results to better their care. On this project, I learned Ruby on Rails and gained experience in agile team development.
